FOREWORD

Praise and thanks be to God Almighty for His guidance, enabling the implementation and preparation of this report on the basic photography training activities in Ngada Regency (Bajawa and Riung) to be carried out successfully.

The Basic Photography Training Activity is one of the activities organized by the Nusa Tenggara Timur Natural Resources Conservation Agency, funded by a direct foreign grant from the IN-FLORES Project for the 2024 fiscal year.

This activity is expected to be beneficial for enhancing the capacity or skills of technical staff in the field within the scope of the East Nusa Tenggara Natural Resources Conservation Agency in supporting the agency's functions in the field of photography and image capture.

This activity is also expected to serve as a learning platform for staff of the East Nusa Tenggara Natural Resources Conservation Agency who participate in this training program with wildlife photography experts, enabling them to apply the knowledge gained in their fieldwork and produce documentation in the form of photos and videos that can be utilized as needed for educational, research, informational, and other purposes.

I. INTRODUCTION

A. Background

The principle of photography is to focus light with the help of refraction so that it can burn the light-capturing medium. The medium that has been burned with the right amount of light will produce an image identical to the light that enters the refracting medium (hereinafter referred to as the lens).

Photography has evolved into a lifestyle, beginning with the advent of the digital era and the rise of social media.

The NTT KSDA Office manages 28 conservation areas with the status of Nature Reserve and Nature Conservation Area. Conservation areas in East Nusa Tenggara are scattered across small uninhabited islands and the main islands of Timor and Flores.

The diverse habitat typology and ecosystem characteristics, including forests, savannas, mountains, and coastal areas, give Nusa Tenggara Timur a unique and beautiful landscape. Photography is expected to serve as a medium for communicating and promoting the natural beauty and biodiversity of the conservation areas in this region.

To provide adequate photography skills to government officials, particularly those at the East Nusa Tenggara Natural Resources Conservation Agency (BBKSDA NTT) and several community-based groups, a capacity-building photography training program has been allocated for officials within the BBKSDA NTT.

B. Purpose

This activity aims to create selected government officials and community members as resources for monitoring biodiversity in conservation and non-conservation areas in East Nusa Tenggara as material for better illustrated publications.

C. Time and Place

The activity will be conducted at two locations in Ngada Regency, namely:

1. Presentation of Materials

Venue : Dewandaru Hotel, Bajawa
: December 6, 2024

2. Field Practice

Location : Riung Subdistrict
Date : December 7–8, 2024

D. Funding

This activity is funded by the 2024 *Annual Work Plan* (AWP) budget, specifically the Direct Foreign Grant (HLLN) for the IN-FLORES Project.

II. ACTIVITY OUTCOMES

III. CLOSING

This activity is one of the beneficial initiatives to enhance the field capabilities of BBKSDA NTT staff and support the agency's functions in producing high-quality photographs of plants and wildlife. These photographs can be utilized as educational or promotional materials regarding the biodiversity of East Nusa Tenggara, thereby increasing public awareness—both domestically and internationally—and encouraging active participation in environmental conservation efforts to support conservation in Indonesia.

May this activity provide benefits to the participants and be applied in their respective workplaces, resulting in high-quality photographs.
